PROFESSIONAL SUMMARY

Product Manager with hands-on backend engineering experience using Node.js, Express.js, MongoDB, and PostgreSQL. Builds end-to-end: from user research, PRD and TRD writing, writing tickets and acceptance criteria through to API design, prototyping, and GTM coordination. When there is a problem to solve, the answer is a working prototype, not just a document. Currently building AI-powered products at the intersection of LLMs, AI Agents, and automation. Seeking an Associate Technical Product Manager role.

WORK EXPERIENCE

HNG Tech (Nigeria's largest remote tech talent accelerator)

Lagos, Nigeria

Product Manager Intern

April 2026 - June 2026

- Led a 53-person cross-functional team (frontend, backend, DevOps, QA, Design, and Marketing) as Technical PM Lead, shipping Open Profile from zero to live production in 3 weeks.
- Authored the complete PRD for 4 core features, defining user stories, acceptance criteria, edge cases, and success metrics that aligned the 53-person team before development began.
- Co-authored the TRD with the backend team, defining system architecture, 46 API endpoints, PostgreSQL database schemas, and security requirements.
- Wrote and managed every implementation ticket (expected behaviour, edge cases, acceptance criteria) for the frontend and backend teams in ClickUp throughout the 3-week sprint.
- Collaborated with QA across UI/UX, functional, UAT, and regression testing cycles, surfacing and triaging 37 bugs (21 functional, 11 UI/UX, 5 validation) against the spec before launch.
- Partnered with Marketing on a GTM strategy targeting 150–250 waitlist signups, 25–30 active beta testers, and 100+ activated users by the end of launch week, combining founder-led outreach, community channels, and social media.
- Designed user flows that closed a design-engineering alignment gap, eliminating a 3-week rework cycle.

The Curve Africa (Software Engineering Institute)

Lagos, Nigeria

Backend Development Trainee

May 2025 - December 2025

- Designed and deployed secure RESTful APIs across 5 backend projects, featuring authentication, authorization, CRUD operations, data validation, payment gateways, and security requirements.
- Managed and optimized 3 databases and ORMs (MySQL, Sequelize, MongoDB) supporting these projects.
- Led a 6-person team (2 backend, 2 frontend, 2 product designers) as Team Lead, PM, and backend developer to build TraceAid, documenting 86 API endpoints via Swagger for frontend integration.

BorderFlo (Cross-border educational payment startup)

Lagos, Nigeria

Product Management Intern

November 2024 - March 2025

- Coordinated a 6-person team (1 product designer, 2 frontend and mobile, 2 backend, 1 QA) to build and launch BorderFlo's MVP Android app in January 2025, cutting build time from 8 to 6 weeks (25% faster).
- Used PostHog Analytics to diagnose a 40% post-signup churn rate due to upfront KYC requirements (NIN verification), then proposed and shipped progressive (tiered) onboarding that cut identity-verification drop-off by 25%.
- Ran 10 user interviews and iterated on PRDs for onboarding and wallet funding, surfacing upfront KYC as the core friction point in the onboarding flow.

SavvyCrest Limited (Business Consulting and Services)

Lagos, Nigeria

Research and Strategy Analyst (NYSC)

December 2023 - October 2024

- Led market intelligence and competitive benchmarking for 30+ SMEs across sectors, including FMCG, Tech, Real Estate, and Professional Services, diagnosing root causes for declining market share and identifying new revenue streams.
- Designed and executed 50+ mixed-method research projects (qualitative interviews, quantitative surveys, and secondary desk research) to extract actionable consumer and market insights.
- Synthesized complex data to inform turnaround strategies, business restructuring, or operational optimizations.

PROJECTS

Invoiceser - AI Product Manager

Stack: Next.js 14, Convex, Groq (Llama 3 70B), KoraPay | [Live Link](#)

- AI-powered invoicing and payments platform for freelancers, creators, and small agencies; consolidates invoice creation, automated payment reminders, multi-currency tracking, and a conversational AI assistant for cash-flow questions into one tool, replacing the fragmented spreadsheet and email workflow most users default to.

- Architected a context-injection pipeline for the AI assistant (Convex serializes the user’s own data into a read-only system prompt before each Groq Llama 3 70B query) to prevent hallucinated financial answers, and enforced Row-Level Security on every Convex query and mutation, making cross-tenant data leakage architecturally impossible.

TraceAid - Product Manager and Backend Developer

Stack: Node.js, Express.js, MongoDB, KoraPay | [Live Link](#) | [Swagger API Docs](#)

- Three-sided milestone-based crowdfunding and accountability platform connecting donors, fundraising organizations, and admins; locks donor funds in per-campaign escrow and releases them only after evidenced proof of impact upload (photos, PDFs, and videos).
- Designed and implemented an 86-endpoint API architecture across 5 domains (user management, campaigns, milestones, donations, evidence verification), including escrow-style fund-locking logic that ties payout authorization to admin-approved milestone evidence.

Open Profile - Technical PM Lead

Team: 53 people | 3 weeks sprint | [Live Link](#) | [PRD](#) | [TRD](#)

- Web-based identity platform giving freelancers, creators, and indie builders a single owned, searchable public profile, replacing the fragmented LinkedIn/Behance/GitHub/personal-site presence with one structured, discoverable URL.
- Defined system architecture spanning 46 API endpoints and PostgreSQL schemas, wrote and implemented frontend and backend tickets.

EDUCATION

University of Lagos (UNILAG)	Lagos, Nigeria
Bachelor of Science, Industrial Relations and Personnel Management	December 2017 - October 2023
First Class (Hons) CGPA: 4.82 / 5.0 Top 1%	

CERTIFICATIONS

Diploma in Backend Engineering, AltSchool Africa	November 2024 - October 2025
Product Management, DevCareer	August 2023 - April 2024
Advanced Diploma in Business Administration, Tekedia Institute	March 2023 - February 2024

LEADERSHIP EXPERIENCE

Head (Corporate Com) & Deputy Head (Programs), MSA Career Expo & Entrepreneurship 8.0 September 2022– May 2023

- Led a team of 4 to develop proposals and partnership letters while maintaining ongoing internal and external communications, which helped secure 12 distinguished speakers and 32 sponsor organisations for the annual faculty event.

ACHIEVEMENTS AND AWARDS

HNG i14 Finalist, Completed all 10 stages, Final 140 out of 10,000 participants	June 2026
Best in Product Management, Top 1% of 500 PM interns, HNG i14	June 2026
HOD Prize and Prof. Tayo Fashoyin Prize for Best Graduating Student, Dept of IRPM, UNILAG	October 2023
Sole First-Class student in IRPM 21 set, Best Graduating Student in IRPM 42-year history	October 2023

SKILLS AND TOOLS

- Product:** Product Roadmapping and Strategy, PRD and TRD Writing, User Research and Interviews, Market Research, Design Thinking, Sprint Planning and Facilitation, Backlog Management, Feature Prioritization (RICE / MoSCoW), Stakeholder Management, Competitive Analysis, User Story Mapping, Data Analysis and A/B Testing, Agile and Scrum
- Technical:** JavaScript (ES6+), Node.js, Express.js, RESTful APIs, MongoDB, MySQL, Sequelize, Convex, PostgreSQL, Database Design and Architecture, JWT Authentication, API Testing, API Documentation (Swagger), QA Testing, Prototyping, Git and GitHub, KoraPay, Paystack
- Tools and AI:** Figma, Jira, Linear, ClickUp, Notion, Asana, Miro, Whimsical, Confluence, Mixpanel, PostHog, Power BI, Postman, Claude Code, Cursor, VS Code, Antigravity, n8n, LLM APIs
